13. Cash In

1. Installing Fondly on Your Phone

Fondly is a web app that installs like a real app — no app store needed. Once installed, it gets its own icon on your home screen and opens full-screen, just like any other app.

On Android (Chrome)

1. Open Fondly's link in **Chrome** (not Messenger or another app's built-in browser).
2. Tap the  menu in the top-right corner.
3. Tap **"Install app"** or **"Add to Home Screen."**
4. Confirm. The Fondly icon now appears on your home screen.

On iPhone (Safari)

1. Open Fondly's link in **Safari** (not Messenger or another app's built-in browser).
2. Tap the **Share** button (square with an arrow) at the bottom of the screen.
3. Scroll down and tap **"Add to Home Screen."**
4. Tap **Add**. The Fondly icon now appears on your home screen.

Important: if you opened the link from Messenger, Facebook, or another app, look for a **"Open in Browser"** or **"Open in external browser"** option first. Install options never appear inside another app's built-in browser.

2. Signing In & Creating an Account

The first screen you'll see is the sign-in page.

- If you already have an account, enter your **email** and **password** and tap **Sign In**.
- New here? Tap "**Create an account**" at the bottom to sign up in a few seconds.
- Your session stays signed in between visits — you won't need to log in every time you open the app.

All connections are encrypted (256-bit), and your data is tied only to your account.

3. Home Dashboard

Home is your at-a-glance summary — everything else in the app is one tap away from here.

- **Today's spend** — how much you've logged today; tap the camera icon to scan a receipt.
- **Net Worth** — your assets minus liabilities across all linked accounts.
- **Bills & Subscriptions, Debt Tracker, Goals & Plan, Split Bills, Financial Coach, AI Assistant** — quick preview tiles that open the full feature.
- **Live Flow Snapshot** — total money in vs. money out for the current cycle.
- **Cash In and Log Expense** — the two buttons you'll use most, for adding income or recording a purchase.
- **Recent Outflow Activity** — your latest transactions, with category and payment method tags.

Home dashboard, laptop/desktop browser view

4. Logging an Expense

The screenshot shows the 'Log Outflow' screen in a mobile app. At the top, there's a header with a close button, the title 'Log Outflow', a sub-header 'PH Manila Cycle', and a balance indicator '₱108,050.00 Remaining Pot'. Below this is a 'Mindful Outflow Check' section with a warning icon and text: 'Logging in real-time protects your month-end runway. Cash & instant e-wallets sync automatically with your principal cushion.' The main section is 'OUTFLOW AMOUNT (PHP)' with a large input field showing '₱ 0.00' and four preset buttons: '+₱50', '+₱100', '+₱500', and '+₱1,000'. Below the amount is a 'Funding Channel' section with the text 'Paid via GCash • Deducted from Pot'. It contains six buttons: 'GCash' (selected, with phone number 0917 44 4912), 'Maya' (Wallet / Card), 'QR Ph' (Merchant QR, with a BSP logo), 'Cash' (Pocket money), 'Bank' (InstaPay / BPI), and 'Cards' (Debit / Grab). The 'Category' section has four buttons: 'Dining & Groceries' (selected), 'Transport & Commute', 'Bills & Utilities', and 'Shopping & Lazada'. At the bottom is a 'Merchant or Note' section with a text input field containing 'e.g. Jollibee BGC High Street', a 'Quick:' section with buttons for 'Jollibee', '7-Eleven', 'Angkas / Grab', and 'Me', and a 'Principal Cushion' section showing a progress bar at '22% Untouched' with text: 'Logging ₱450.00 leaves ₱24,150.00 principal cushion intact for the remainder of this cycle.' The bottom navigation bar has four icons: Home, Breakdown, Plan, and Activity (highlighted in green). A large green button at the very bottom says 'Confirm & Log Outflow →'.

Tap **Log Expense** from Home whenever you spend money.

- Enter the **amount** and pick a **category** (Groceries, Dining, Bills, etc.).
- Choose the **payment method** — GCash, Maya, QR Ph, or Cash.
- Save it, and it instantly appears in your Recent Outflow Activity and updates your Today's Spend total.

5. Spending Breakdown

The Breakdown tab shows where your money actually goes.

- See total spending broken down **by category**, with amounts and percentages.
- Use it to spot categories that are quietly eating your budget.
- Your name and avatar can also be edited from this screen.

6. Bills & Subscriptions

Keep every recurring bill and subscription in one place.

- Add a bill with its **amount** and **due date**.
- Fondly reminds you before it's due so nothing gets missed.
- Tap a bill and mark it **Paid** once you've settled it.

7. Debt Tracker

Track money you owe, and money others owe you, side by side.

- Add a debt with who it's with and the amount.
- Log a **payment** against it as you pay it down or get paid back.
- The summary at the top always shows your net "You owe" vs. "Owed to you."

8. Goals & Plan

Set savings targets and track your progress toward them.

- Tap **"Set new savings target"** to create a goal — give it a name and a target amount.
- Tap **+ Add Money** on any goal to top it up.
- Tap the **trash icon** next to a goal's percentage to delete it — you'll be asked to confirm first, since it can't be undone.
- The **Coach** tab (top of the page) gives automated cushion rules and personalized nudges based on your spending pace.

New: goals can now be deleted directly from this screen.

9. Split Bills

Splitting a bill with roommates or friends? Track it here instead of a group chat.

- Create a split bill, add the total amount, and list who's involved.
- Mark each participant **Paid** as they settle their share.
- See at a glance who still owes what.

10. Financial Coach

Bite-sized lessons on budgeting, saving, and healthy money habits.

- Work through lessons at your own pace.
- Completed lessons count toward your progress shown on Home.

11. AI Assistant

Your built-in money assistant, available any time.

- Ask questions about your spending in plain language.
- Log an expense just by describing it in chat.
- Snap a photo of a receipt and let the assistant read and log it for you.

12. Streaks

Fondly rewards consistency, not perfection.

- Log at least one expense a day to keep your streak going — shown by the flame icon in the header.
- Longer streaks build the habit of tracking every peso, which is what actually improves your finances over time.

13. Cash In

Add money into Fondly to fund your account.

- Tap **Cash In** from Home.
- Choose **GCash** or **QR Ph** as your funding method.
- Confirm the amount and complete the payment — your balance updates automatically once it clears.

Note: Buy Load is marked "Available soon" — it's coming in a future update.
